Proposal Name Regional Planning Grant to Complete an IRWM Plan for the new Greater Monterey County Region *

Proposal Objective The objective for this Planning Grant request is to bring an existing IRWM Functionally Equivalent Plan (FEP) to a completed and adopted IRWM Plan that meets current IRWM Program standards, and to significantly strengthen the IRWM planning process for the new Greater Monterey County (GMC) IRWM region. The GMC region represents an expansion of a former IRWM region, the Salinas Valley region, which was created under Proposition 50. The new region was created to address significant IRWM Plan coverage voids in the Central Coast Funding Area. A Regional Water Management Group for the new Greater Monterey County region was formed in January 2009, expanding the former Salinas Valley RWMG from just three organizations to 18 organizations and introducing several important geographic areas within Monterey County into the IRWM planning process that had not been represented previously. Significant progress has been made toward development of a new IRWM Plan for the region, but the Plan is still far from complete. Planning Grant funds are therefore being requested to complete a final IRWM Plan for the Greater Monterey County that will meet the current IRWM standards. In addition, Planning Grant funds will provide much needed support for the IRWM planning process, including specifically: increased outreach to disadvantaged communities and Native American tribes; an evaluation of climate change impacts on water supplies and natural resources in the region; the development of a comprehensive data management system with the potential for expansion and use for the entire Central Coast Region; the development and testing of a new conflict resolution approach ("Water Project Reconciliation"); support for increased stakeholder outreach and participation (including public workshops and website development); a tool to assist project proponents with economic feasibility analysis; and support for inter-regional coordination on joint projects. *

Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

The objective for this Planning Grant request is to bring an existing IRWM Functionally Equivalent Plan (FEP) to a completed and approved IRWM Plan that meets current IRWM Program standards, and to strengthen and enhance the IRWM planning process for the new Greater Monterey County IRWM region. The Greater Monterey County region represents an expansion of a former IRWM region, the Salinas Valley region, which was created under Proposition 50. The new region was created in order to address significant geographic coverage voids in the Central Coast Funding Area for the purposes of IRWM planning. Since the formation of the new regional boundaries and new Regional Water Management Group (RWMG) in January 2009, significant progress has been made toward developing a whole new IRWM Plan for the Greater Monterey County region, though the Plan is still far from complete. The Planning Grant funds requested in this proposal will enable the RWMG to complete the Plan, as well as bring the existing work up to Proposition 84 standards. In addition, Planning Grant funds will provide much-needed programmatic support for the IRWM planning process. This includes specifically: ?? Support for a part-time IRWM Plan Coordinator to coordinate all IRWM Plan tasks, as well as to write the IRWM Plan and see it through the final approval process ?? Increased outreach and participation of disadvantaged communities and Native American tribes in the IRWM planning process ?? An evaluation of climate change impacts on water supplies and natural resources in the region, including a tool to analyze greenhouse gas emissions on both the project level and the regional level over time ?? Development of a process (called ???Water Project Reconciliation???) to resolve water-related conflicts in the region and to reconcile conflicting projects submitted for inclusion in the Plan ?? Establishment of a comprehensive data management system with potential for expansion and use for the entire Central Coast region ?? Support for increased stakeholder outreach and participation, including public workshops and website development ?? Development of an economic feasibility analysis tool for project proponents ?? Support for interregional coordination on joint projects
